State of Alaska Designates Opportunity Zones

April 20, 2018 JUNEAU –The State of Alaska has formally designated 25 Opportunity Zones as part of a federal program designed to drive long-term capital to distressed communities.

A total of 60 census tracts were identified by the U.S. Department of Treasury as low-income communities that were eligible for the designation. Of these, the State was able to nominate as many as 25 of these tracts as Opportunity Zones. When selecting from among the eligible tracts, the State weighed numerous considerations based on available information and public input from business and community leaders across the state, including:

- Alignment with existing initiatives
- Community support
