CORE SERVICES

SERVICE OFFERINGS

Procurement Services

With access to 500+ manufacturers' solutions, our procurement services ensure that technology solutions meet your unique needs, that fulfillment services align with your business processes, and that solutions are custom configured to your specifications.

Data Center Services

Our iFortress data center solution is a green, energy-efficient modular data center facility that is assembled in the field and easily scales to any size to meet growing needs for maximum flexibility.

Security Solutions

Kwaan Cybertech's extensive portfolio of security solutions, combined with a team committed to understanding your business and uncovering the security risks present in your infrastructure, enables us to assess, plan, implement, and monitor your environment with leading-edge security technology.

Imaging and Configuration Services

Build-to-order hardware, software and server configurations, as well as network builds and image management and deployment, ensure that your business has the right technology in place to meet your needs.

Storage Solutions

Kwaan Cybertech helps solve data storage challenges, and varied business requirements, with advanced modular data centers, hybrid cloud, and hyper converged solutions.

Emerging Technologies

Kwaan Cybertech's Emerging Technologies Practice helps companies train on and learn best practices for implementation of the latest innovations like Virtual Reality/Augmented Reality (VR/AR), 3D Printing, and Artificial Intelligence (AI).
